

Call for Papers

Contribute to **COMMUNITYONE Oslo**
April 15, 2009

Contribute to a jam-packed day of education, innovation, and exchange. Come together with fellow developers and technologists to evaluate dozens of open-source projects currently powering leading Web companies, transforming enterprise IT, and enabling next-generation computing.

OPENING KEYNOTE

Next-Generation Developer Tools
Ian Murdock
Vice President of Cloud Computing Strategy, Sun Microsystems

Do you work on an innovative project based on FOSS technology? Have you experience with FOSS Communities and how they can change the nature of traditional project success ?

- Development and deployment in the cloud and virtualization
- Social networks and Web 2.0 trends
- RIAs, scripting, and tools
- Dynamic languages, databases, and Web and application servers
- Open-source projects, business models, and trends
- And more

Send an 150word (max) abstract to CommunityOne-Oslo@sun.com

We're opening our doors.

CommunityOne is an open developer conference sponsored by Sun Microsystems. After two capacity years in San Francisco, we're rolling out the red carpet in Oslo in April. What can you expect at CommunityOne? No marketing hype or selling tactics, just the opportunity to evaluate open-source projects that span languages (Java(TM), PHP, Groovy, AJAX, Ruby, Python), operating systems (OpenSolaris(TM), Linux, Android), Web and application servers (GlassFish(TM), Apache), databases (MySQL(TM)), services, and more. And you can attend the CommunityOne Oslo main conference at no cost.

Spread the word. Forward this to your friends and colleagues.
